

AACTE Quality Support Workshop

August 2-4 • Columbus, Ohio

Register by July 10

Accessible, affordable, and targeted support for assessment and accreditation in educator preparation

Newly Improved for 2018

The AACTE Quality Support Workshop is back—and even better than before!

Building on the most popular features of last year's workshops, our 2018 event strengthens the focus on helping you **build or refine your quality assurance system** with a choice of introductory or advanced tracks of sessions.

Based on feedback from past participants, other new features include—

- A **“problem of practice” session** for an opportunity to get peers' input on a thorny challenge you're facing
- A **gallery walk** showcasing metrics, rubrics, and other tools brought by attendees
- Dedicated time to work on **your quality assurance plan** with peer and facilitator feedback
- **Office hours with expert facilitators** to get even more personalized advice

Join us for 2 days of intensive focus on the topics you need most. Are you working to meet new requirements for **teacher performance assessment**? We have experts ready to help you understand specific constructs and plan improvements based on candidates' results. Is your institution **preparing for an accreditation visit**? Our experienced facilitators will help you investigate the elements of quality programs and understand how quality assurance intersects with accountability processes.

Find the full agenda, learning objectives, hotel information, and more on our website.

Team registration discounts are available!
